

In-Market Inventory Solution

Scanner App User Guide

Welcome to the IMIS Mobile App

Your In-Market Inventory Solution designed to streamline recipient management, packet distribution, and inventory insights on the go.

The IMIS Mobile App simplifies inventory distribution, enhances accuracy, and provides helpful insights — all from your mobile device.

To begin, tap the LOGIN button. Authentication is completed securely through a browser-based login experience.

Learn how to:

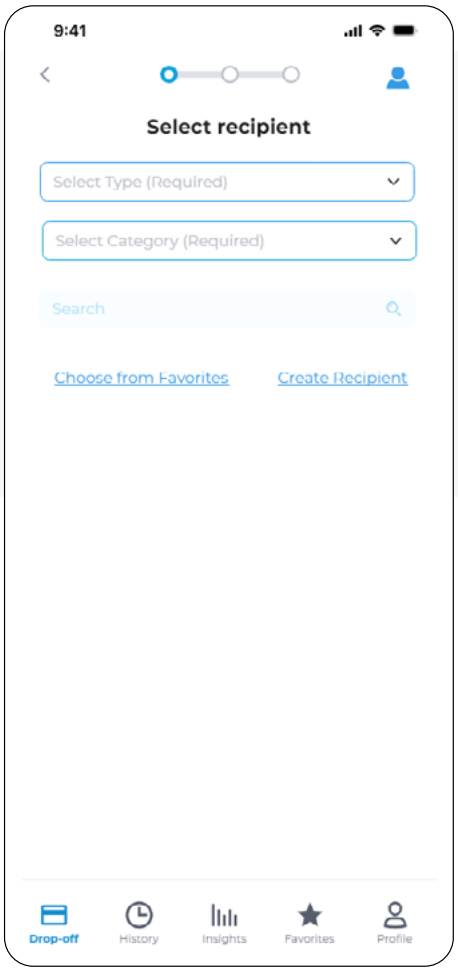

Recipient Selection	3
Inventory Distribution	4
Submission History	5
Activity & Inventory Insights	6

Download the IMIS today to streamline your inventory workflows.

Recipient Selection

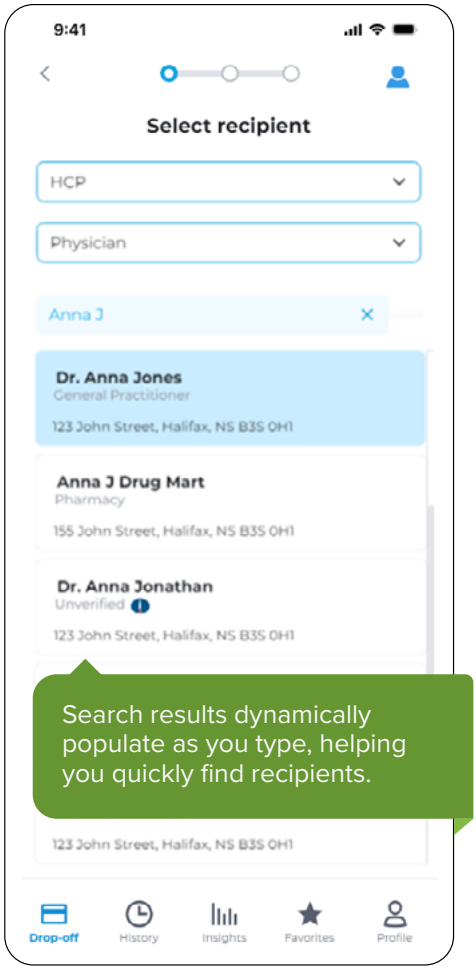

Getting started

Once logged in, you are directed to the Select Recipient screen, the starting point for all distribution activities.

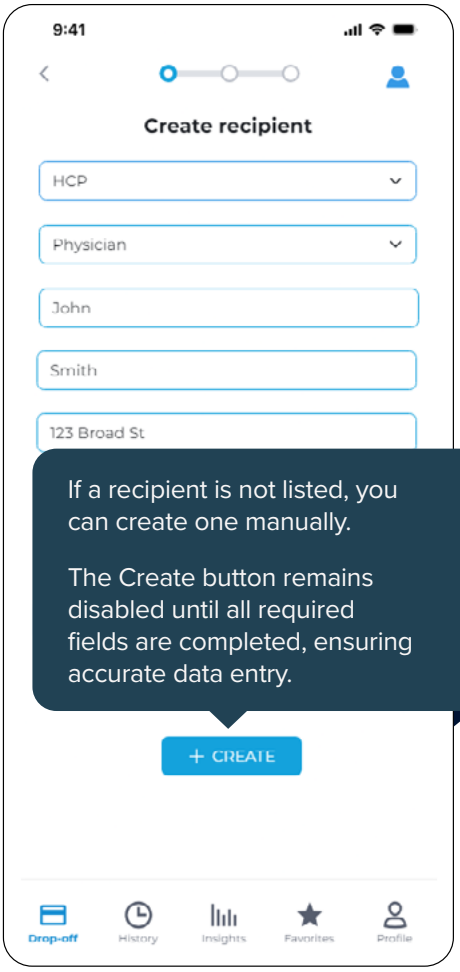

You can search the database, choose from your favourites, or create a new recipient.

RECIPIENT SEARCH

Search results dynamically populate as you type, helping you quickly find recipients.

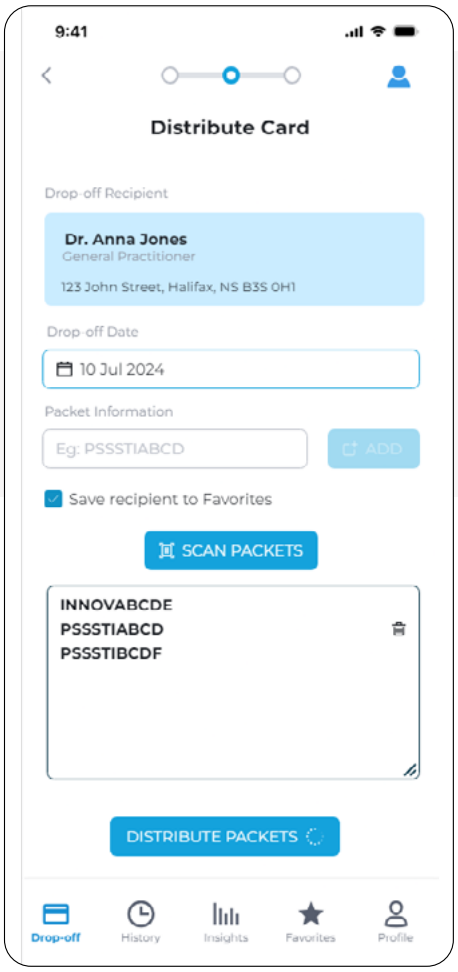

CREATE RECIPIENT

If a recipient is not listed, you can create one manually.

The Create button remains disabled until all required fields are completed, ensuring accurate data entry.

Inventory Distribution

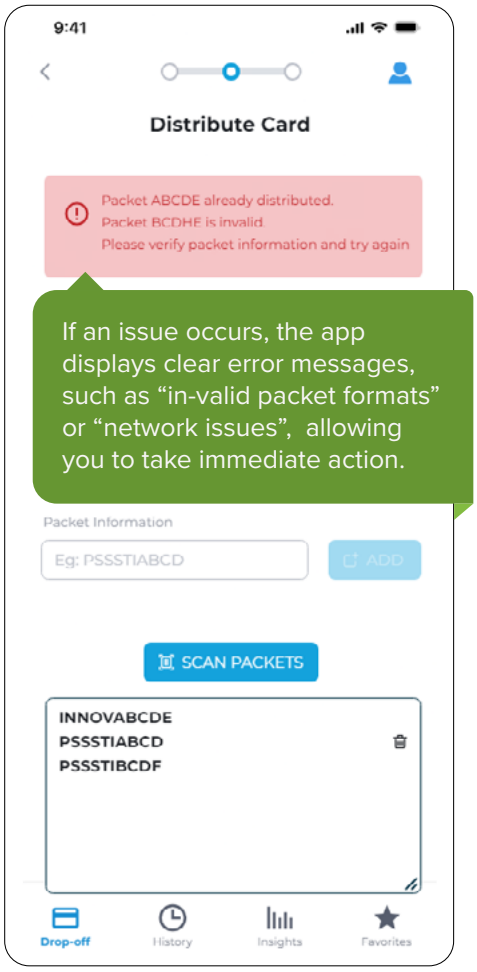

The Favourites tab allows you to manage frequently used recipients.

Once a recipient is selected you can proceed to distribute inventory.

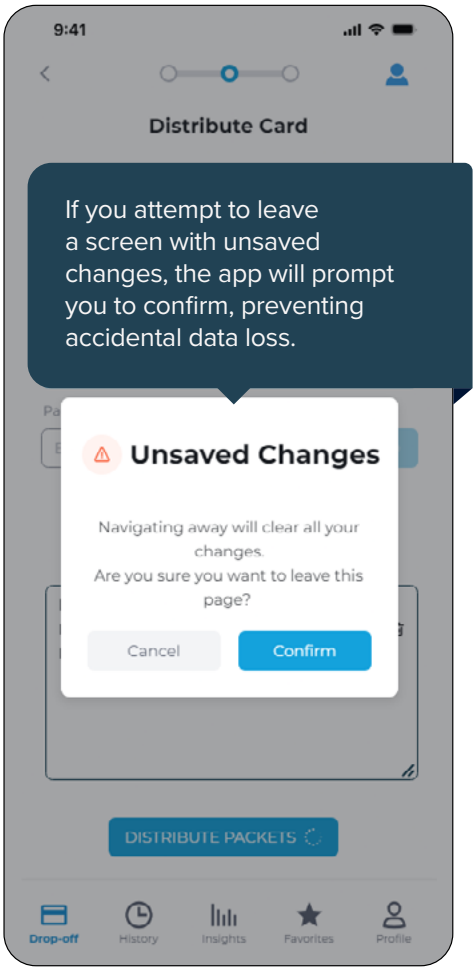

The system validates packet formats before allowing submission, reducing errors.

Once packets are added, tap DISTRIBUTE PACKETS to submit. A loading icon indicates progress while the system processes the request.

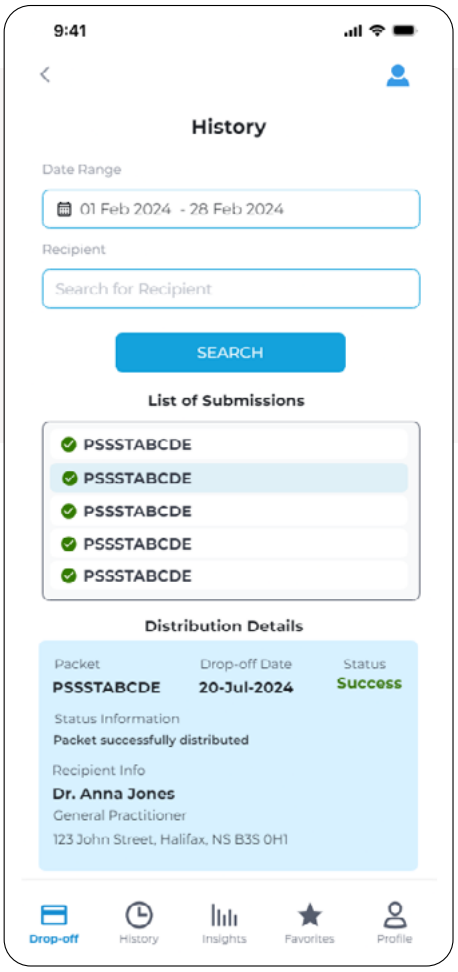

ERRORS AND ISSUES

UNSAVED CHANGES

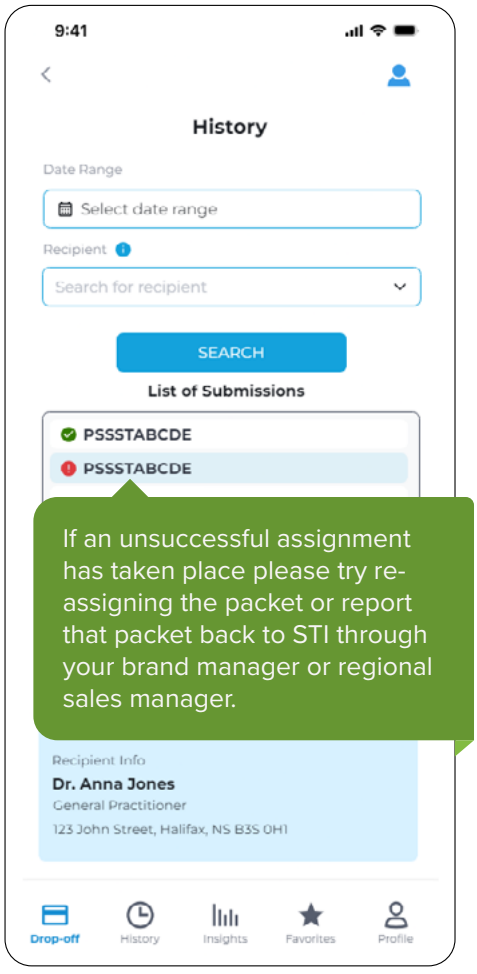

Submission History

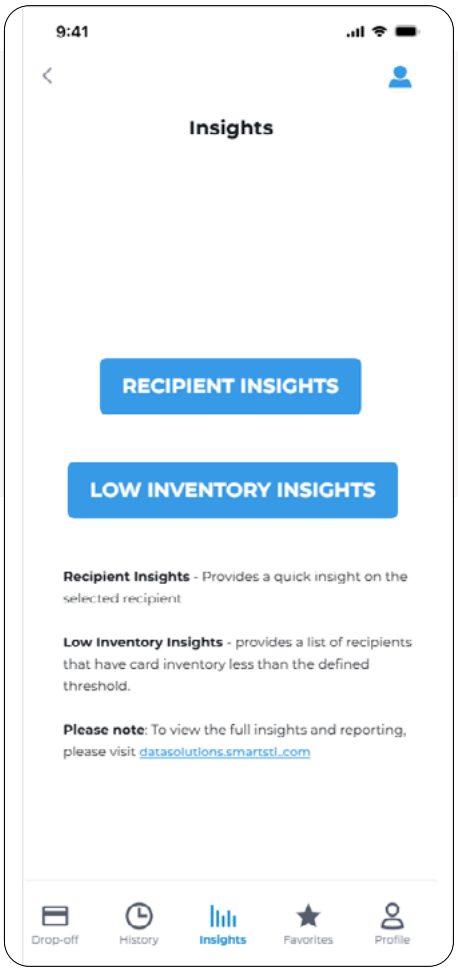

The History tab provides access to recent distributions, with the ability to scroll and review past activity.

View distribution details, status, and recipient info right on your mobile device.

SUBMISSIONS LIST

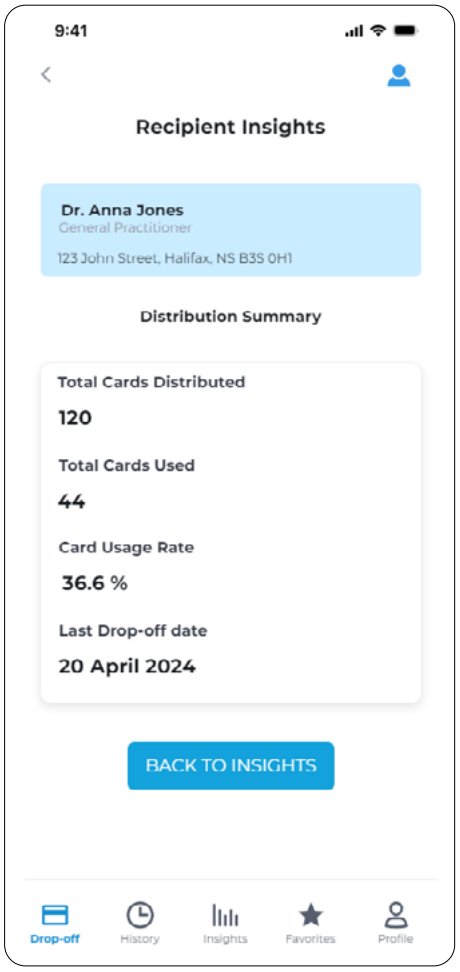

Activity & Inventory Insights

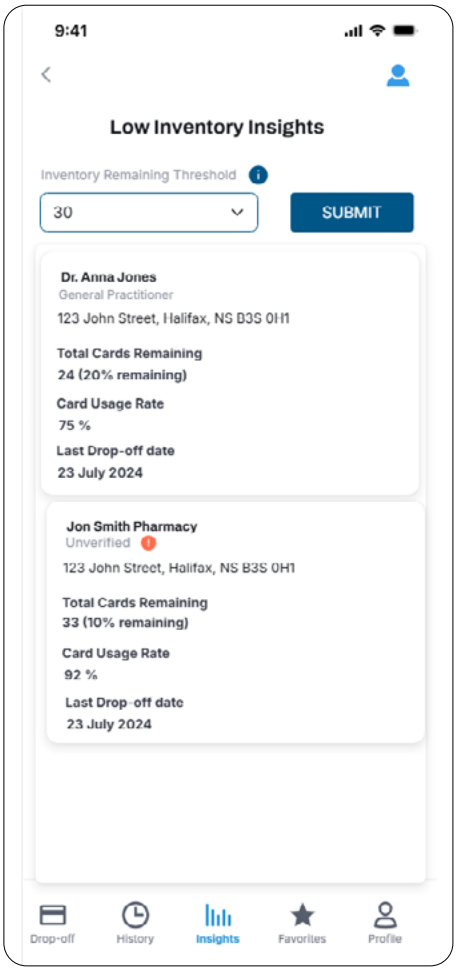

The insights section helps you monitor recipient activity and inventory levels.

This ensures actionable insights based on just your activity, not the activity of the entire network.

RECIPIENT INSIGHTS

LOW INVENTORY
